-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Non-Art Rejections:

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The following language lack proper antecedent basis:

In claim 2, line 4, "said message header information".

In claim 11, line 4, "said message header information".

Art Rejections:

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b)

Art Unit: 2154

only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

4. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Benayoun et al, U.S. pat. No. 6,804,257.

Per claims 1 and 4, Benayoun discloses a system and method for passing message between first and second entities comprising:

a) a message modulator/transmitter (fig. 5) at the first entity for modulating a message comprising a flexible message header (starting header, fig. 4) and a plurality of chained/linked container modules (users data, fig. 4), each having a header portion and a body portion (see col 3, line 48 - col 4, line 15 and col 6, lines 42-48),

b) a message receiver (fig. 6) at the second entity for demodulating a subset of the container modules to regenerate the message (see col 7, lines 49-67).

Per claims 2-3, Benayoun teaches that both the flexible header portion and the container portions (user data portion)

Art Unit: 2154

contain packets each having header and body (see col 6, lines 1-41).

Per claims 5-7, Benayoun teaches that starting header and container module each including prefixed attachment bytes for linking to previous and next modules (see col 6, lines 1-32).

Per claims 8-9, it is noted that the linking fields CRC are only generated and attached to the packets in the edit mode for controlling transmission of the message over the network (see col 6, lines 42-67). These CRC fields are not retained for storage at the receiver (see col 8, lines 1-67).

Claims 10-18 are similar in scope as that of claims 1-9.

Conclusion:

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Vu whose telephone number is 571-272-3977. The examiner can normally be reached on Monday through Friday from 7:00am to 4:00pm. The Group general information number is 571-272-2100. The Group fax number is 571-273-8300.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Follansbee, can be reached on 571-272-3964.
